'I hope you like my bed – it's a special hand-made one which was custom built for me by one of my ex-boyfriends. It's all built to my measurements and has a special springy mattress.

'It really is big, though – that was one of the paramount requirements. There's room on it for three or four people to have a great time in total comfort.

'I suppose it stems from when I was a struggling student living in a tiny bed-sitter in Chelsea. I had an even smaller single bed which was often an embarrassment when I had boys back after a night out somewhere.

'Not very romantic, is it, when you catch your knee on the edge of the bed just at the vital moment?

'However, there's not much danger of that with this monster – unless of course you're about eight feet tall. And I don't normally go out

with men like that.

'My latest lover was really wowed with my bed the first night he saw it. He's been improvising ever since, trying to find new positions and making use of every inch of space.

'Our favourite is to pile the pillows up in the middle of the bed, with him lying on top, the pillows under his bum. This makes his cock stick right up into the air, readily available to be sucked, stroked, fondled or anything.

'He likes nothing better than to look up at me as I lower myself onto him, and slowly work myself up and down, all the while playing with my nipples and breasts.

'Alternatively, I can play with my own clitoris as his tool slips in and out, or, best of all as far as he's concerned, I can reach behind me and play with his balls just as he's about to come.

'It doesn't take very long after that. Sometimes I think he likes my bed more than me.' ♣

'My boyfriend tells me, and I tend to agree with him, that the sexiest thing about me is my mouth. He says I have a very sensual pair of lips, and a very, very sensual tongue!

'Mind you, he doesn't say much when I'm using them on him. Mostly oohs and aahs. Especially when I push my tongue right into his . . . ah, but that would be telling!' ♣

'I've recently been reading the collected works of the poet Shelley. He really did have a grasp of the English language, don't you think?

'He could conjure up such beautiful images and pictures, I sometimes wonder what he could have done if he had turned his mind to erotic writing.

'I'm sure he would have put works such as Lady Chatterley's Lover well and truly in the shade.' ♣
